Publishing the value to IBM cloud

The screenshot shows the IBM IoT Platform console interface. The top navigation bar includes 'Browse', 'Action', 'Device Types', and 'Interfaces'. A search bar is present with the text 'Search by Device ID'. The main content area displays a table of devices, with one device selected: IoT001. The device status is 'Connected', and its type is 'NodeMCU'. Below the device list, a modal window titled 'Recent Events' is open, showing a stream of data events from the device. The events are listed in a table with columns for Event, Value, Format, and Last Received.

Event	Value	Format	Last Received
IoTSensor	{"temp":69,"humid":46}	json	a few seconds ago
IoTSensor	{"temp":17,"humid":85}	json	a few seconds ago
IoTSensor	{"temp":39,"humid":42}	json	a few seconds ago
IoTSensor	{"temp":35,"humid":11}	json	a few seconds ago
IoTSensor	{"temp":59,"humid":8}	json	a few seconds ago
